STANDARD GLASS

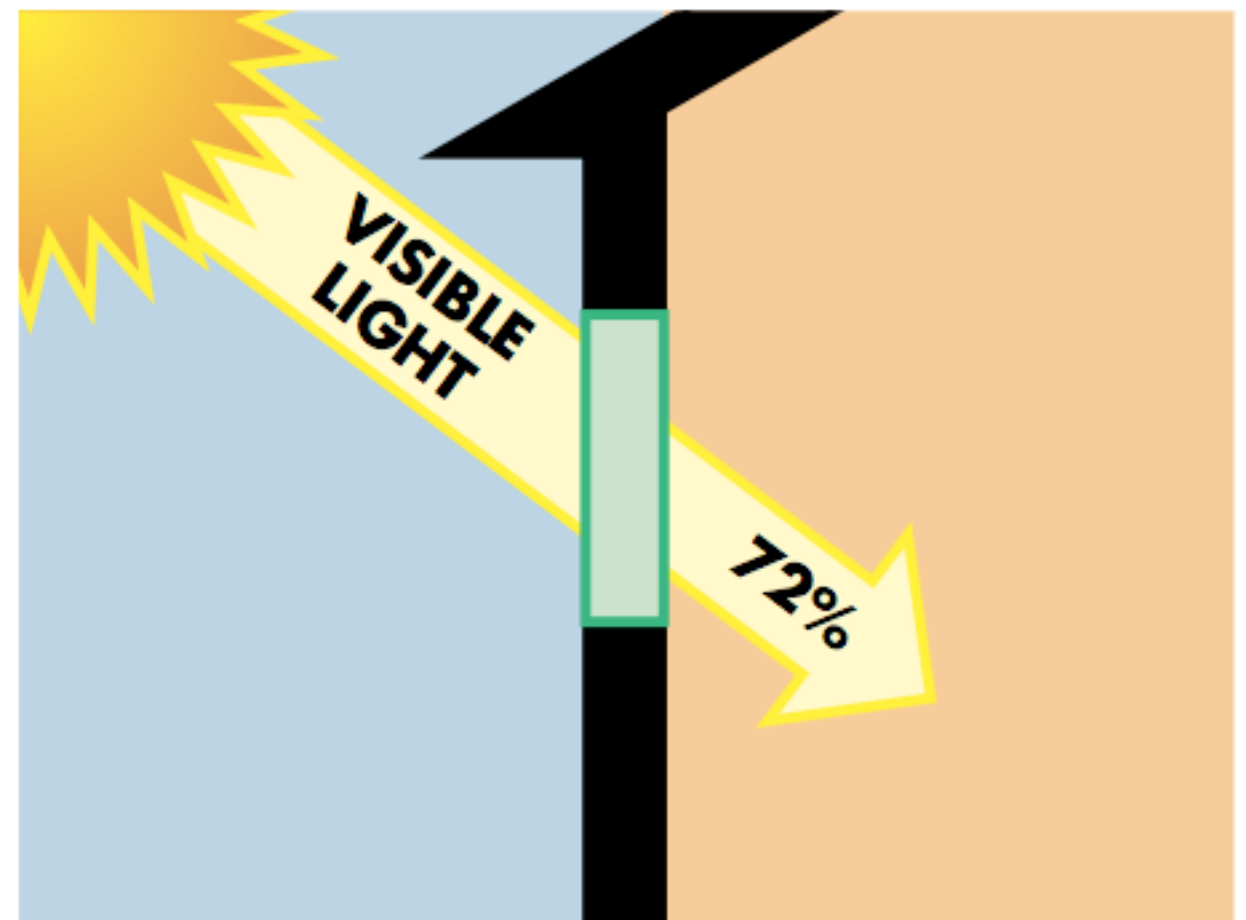

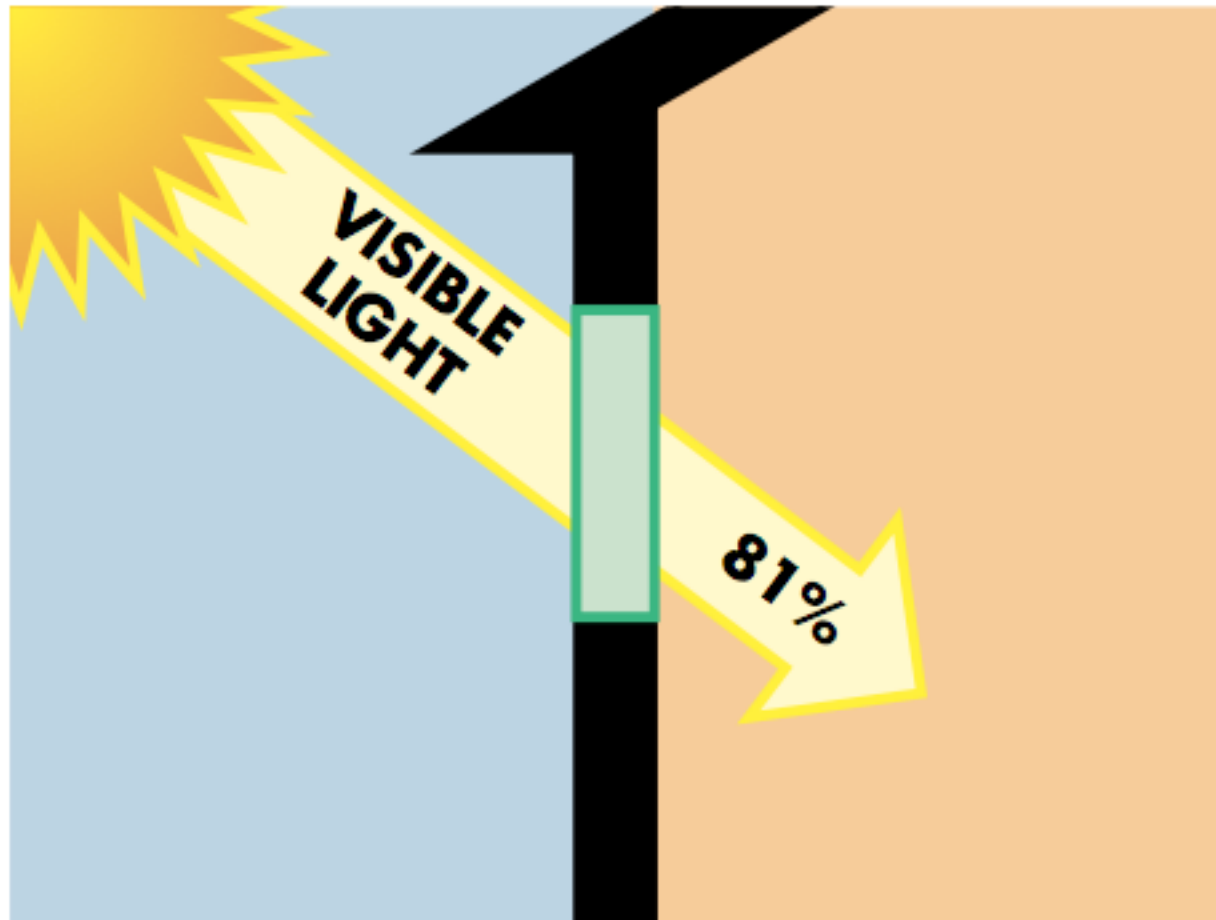

Cooler in the Summer!

The total solar energy transmitted through Solarban 60 glass is almost 50% less than that transmitted by standard clear insulating glass.

- Keeps interiors cooler
- Helps reduce cooling costs

STANDARD GLASS

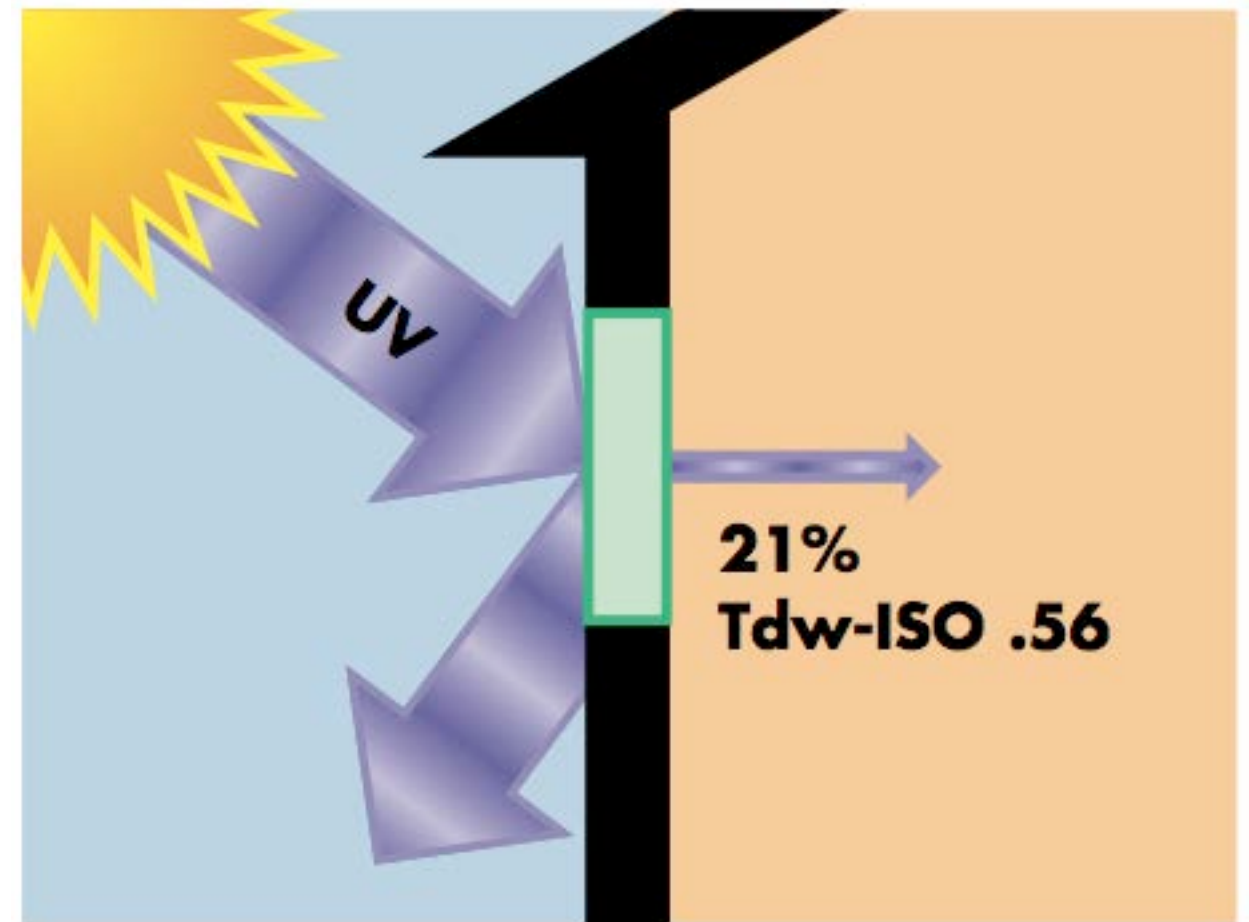

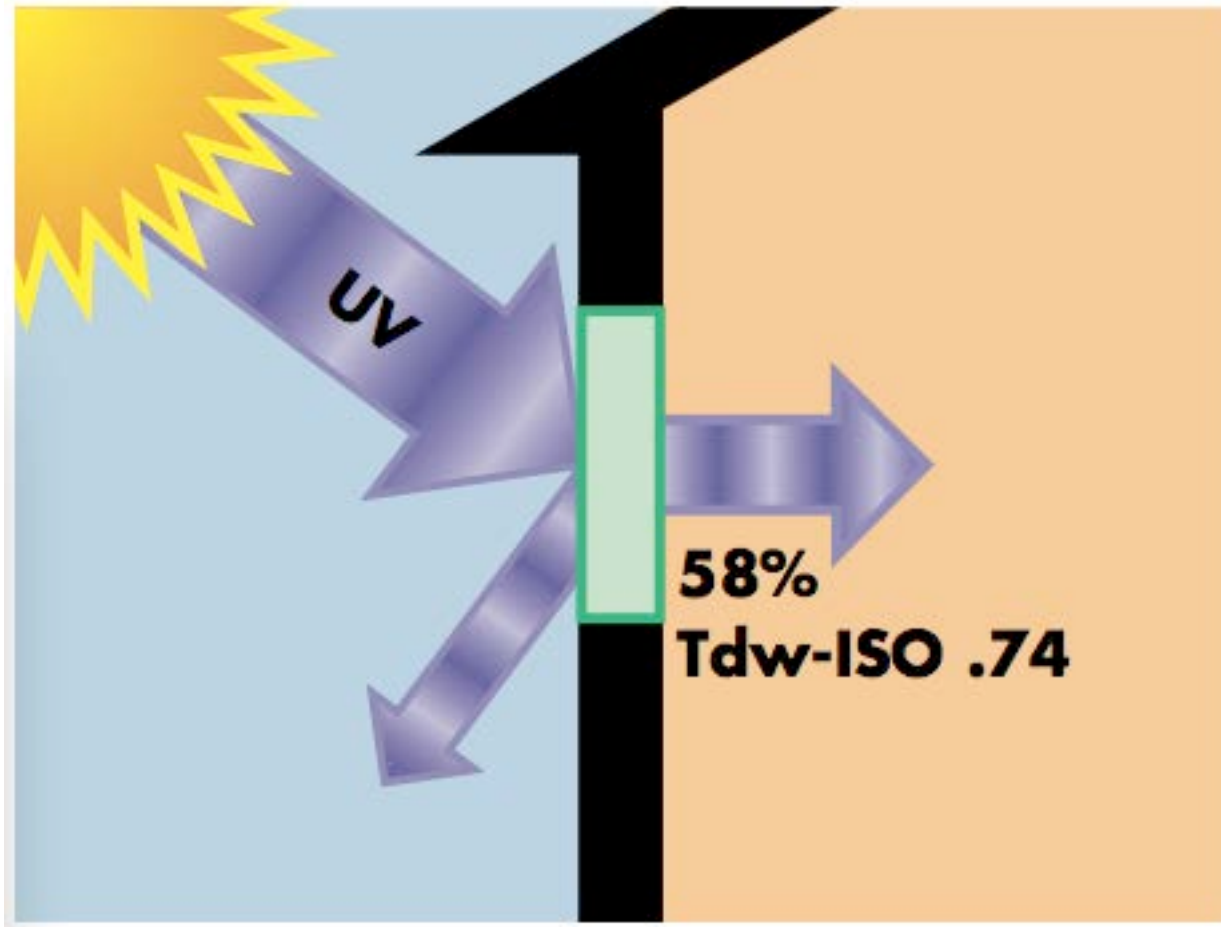

Transmits Visible Light!

The Solarban 60 window transmits almost 90% as much desirable visible light as standard clear insulating glass.

- Provides exterior appearance similar to clear glass
- Provides glare control in bright, sunny climates

STANDARD GLASS

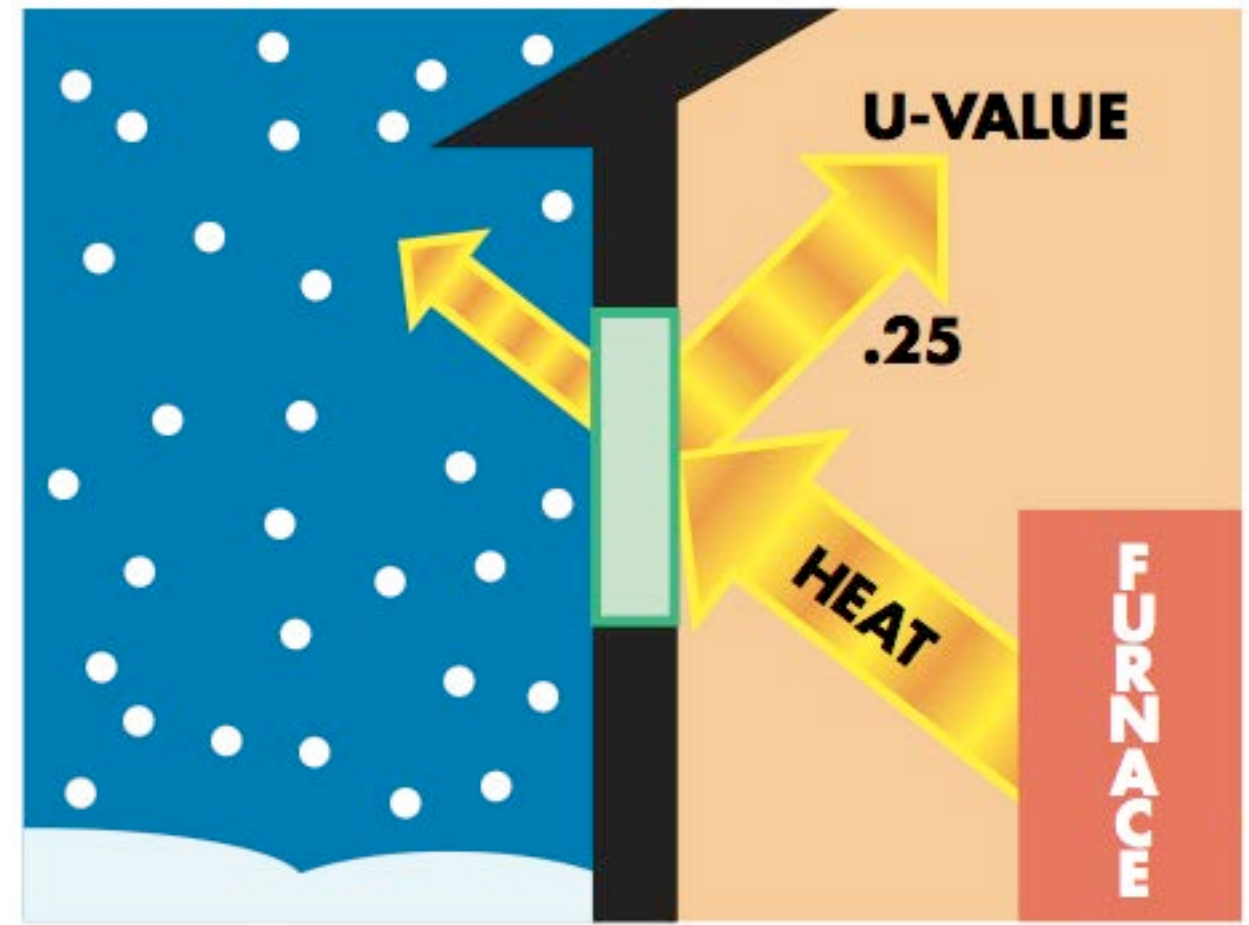

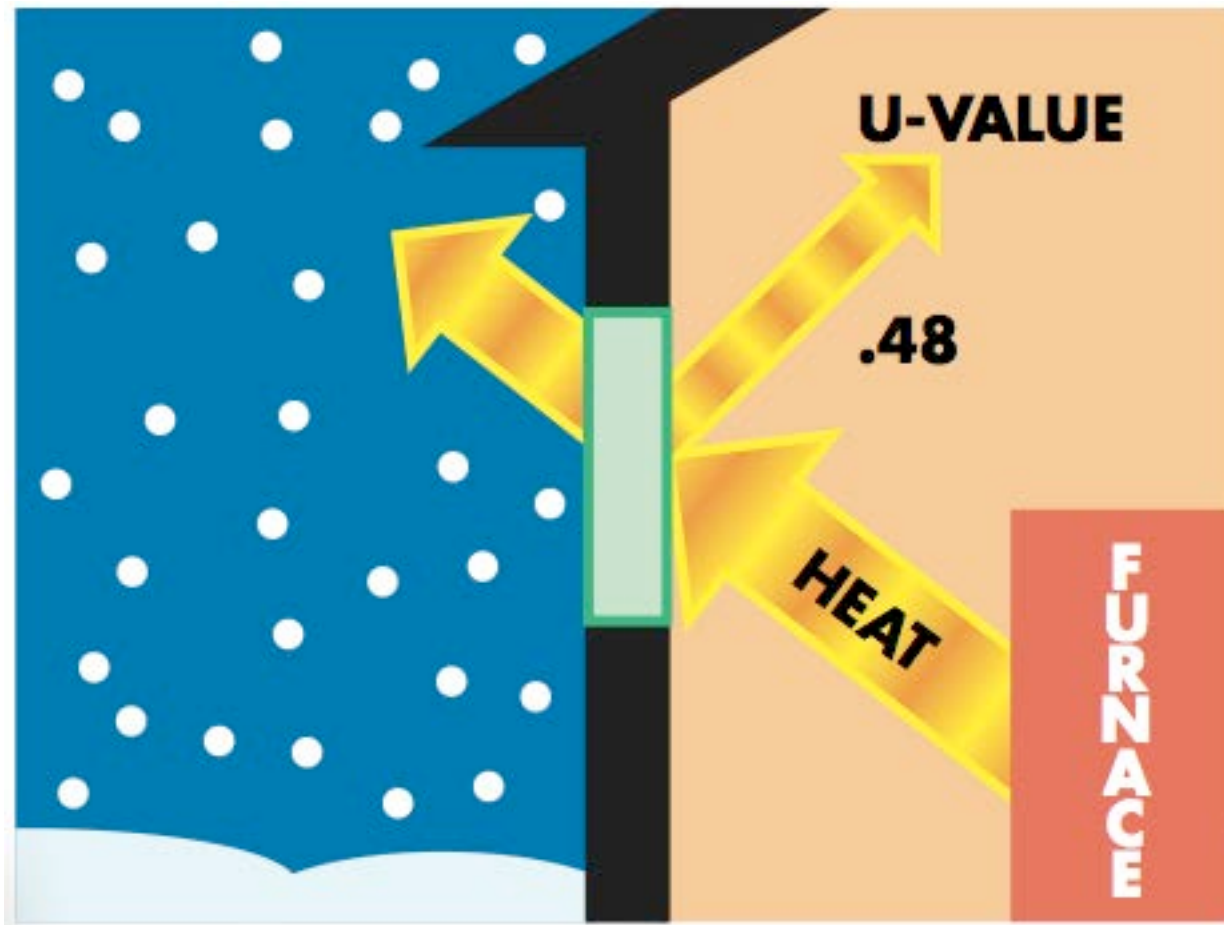

Ultra-Violet Fade Resistance!

While Solarban 60 glass blocks 79% of damaging UV energy, it also blocks other contributors to fading - in all, 24% better than standard clear insulating glass.

- Helps protect interior furnishings
- Helps to keep fabrics and carpets from fading

STANDARD GLASS

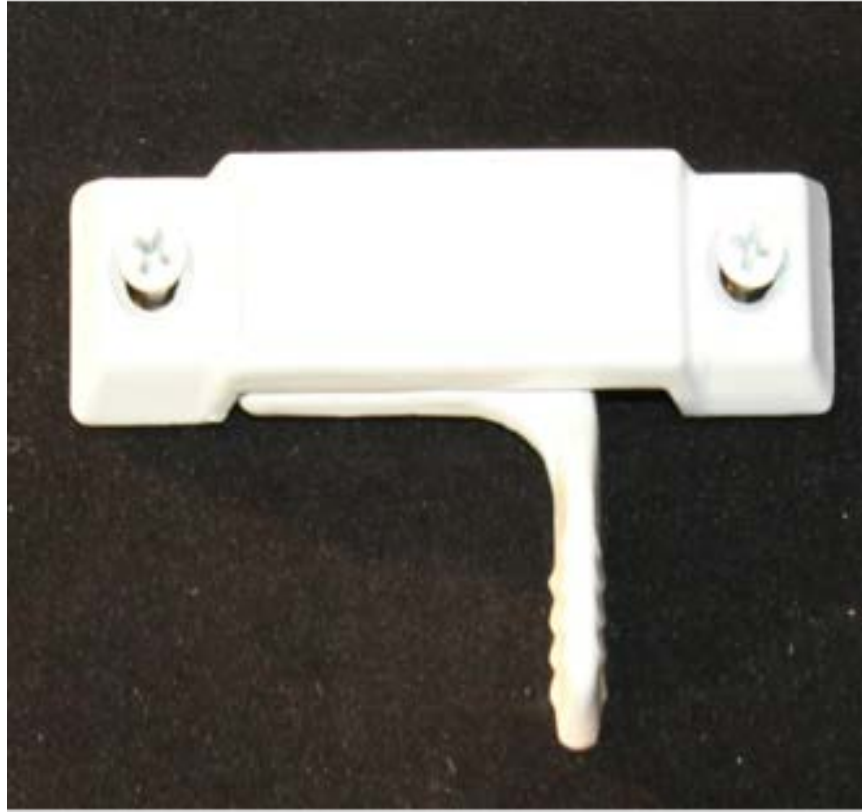

Warmer in the Winter!

The winter nighttime U-Value (insulating value) of Solarban 60 glass is almost 50% better than standard clear insulating glass.

- Lower U-Values mean higher performance
- Helps reduce heating costs

ADJUSTABLE CAM WINDOW LOCKS

- Heavy duty cast aluminum.
- Never requires adjustment.
- Zero failure rate.

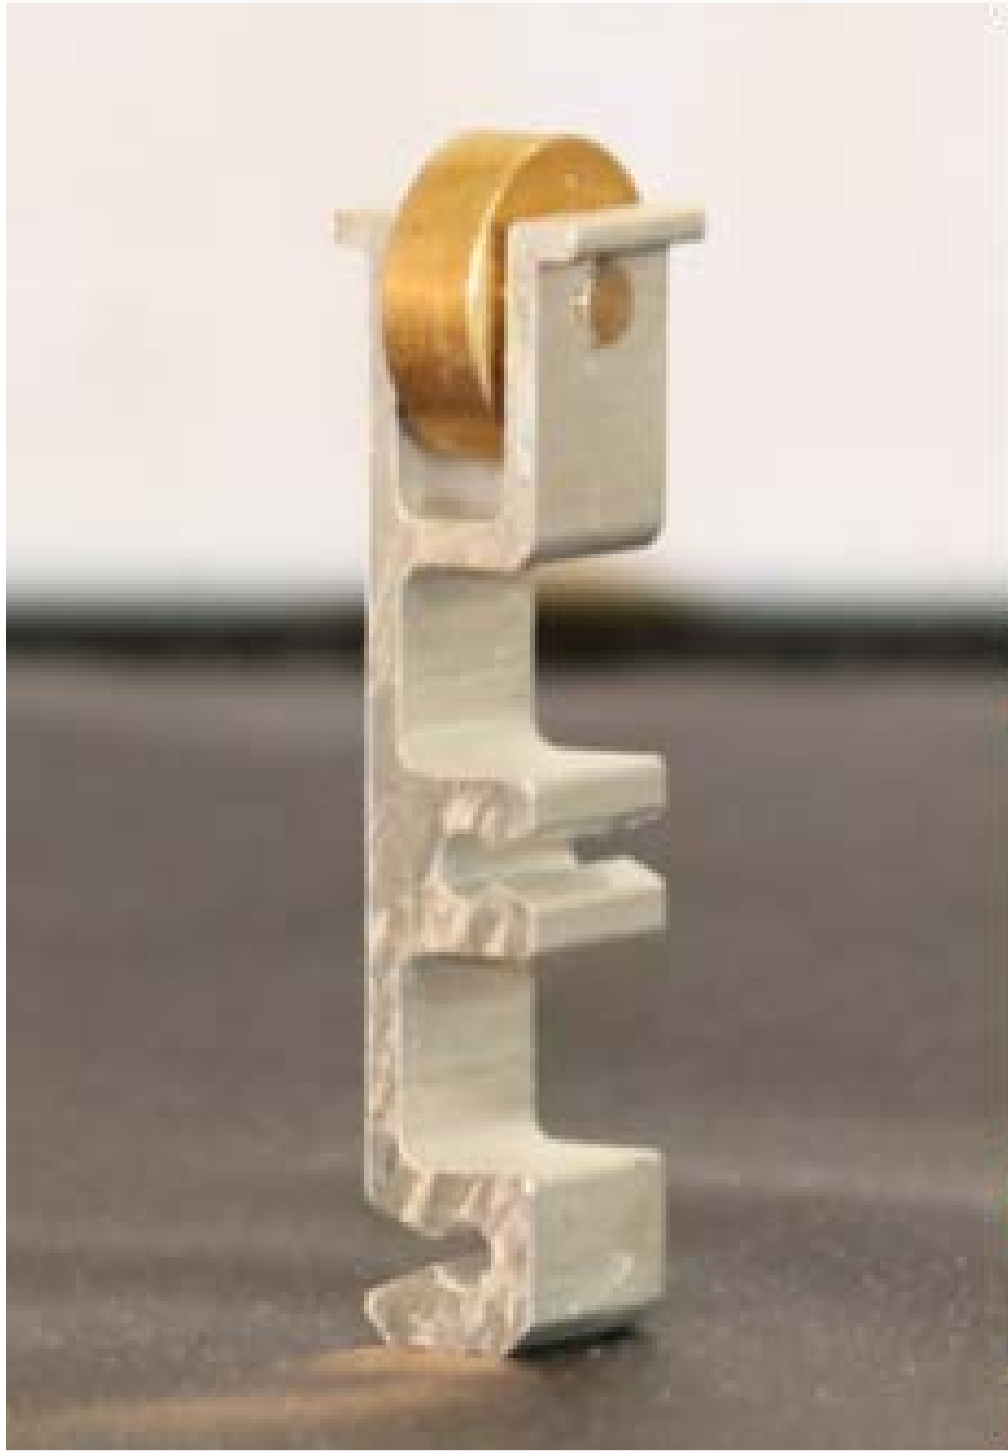

DURALIFE WINDOW WEEPS

One way window weep cover allows water to flow out and prevents wind and pest from entering.

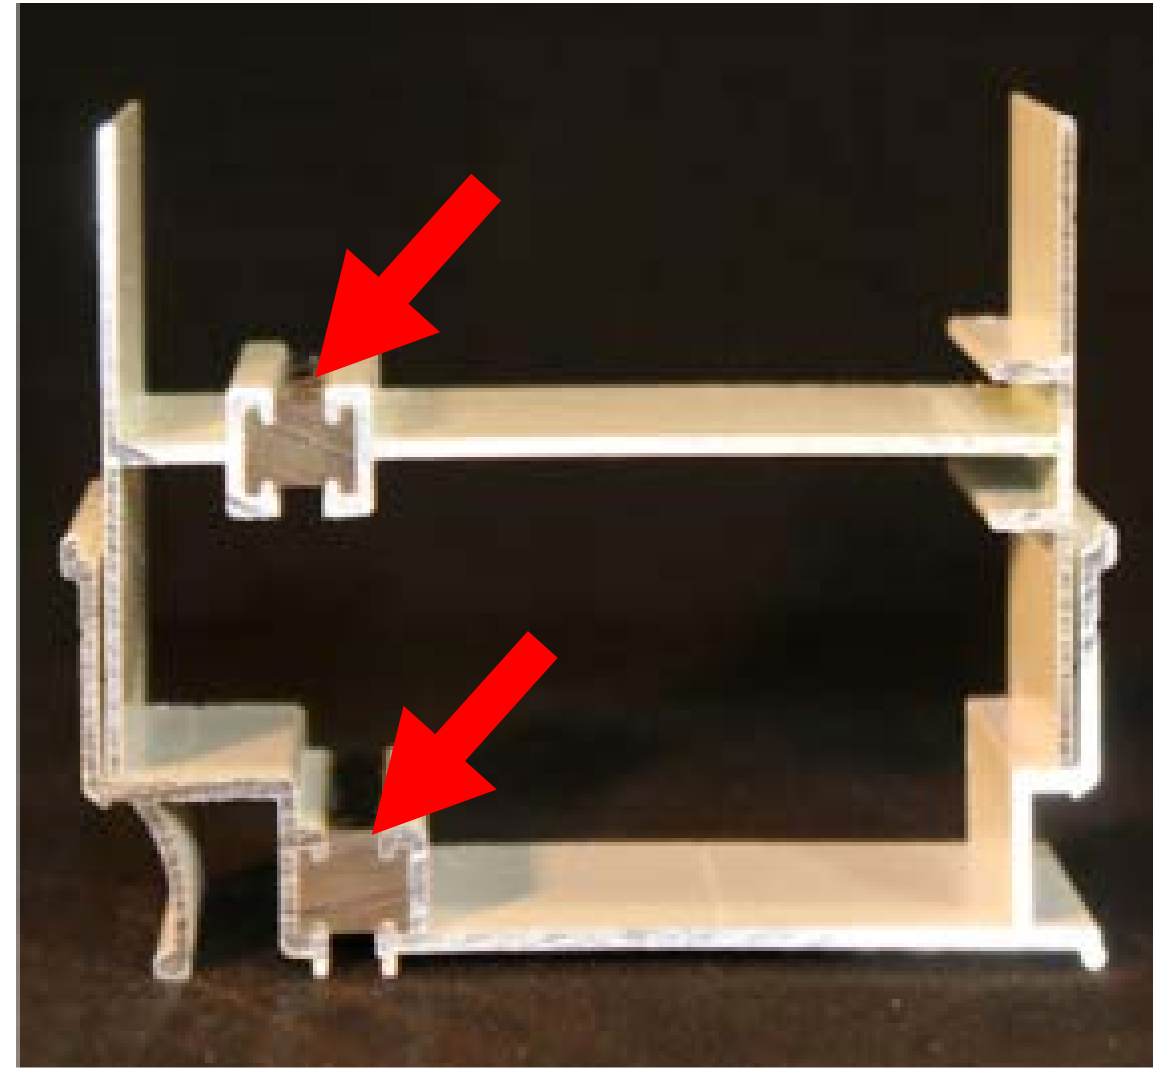

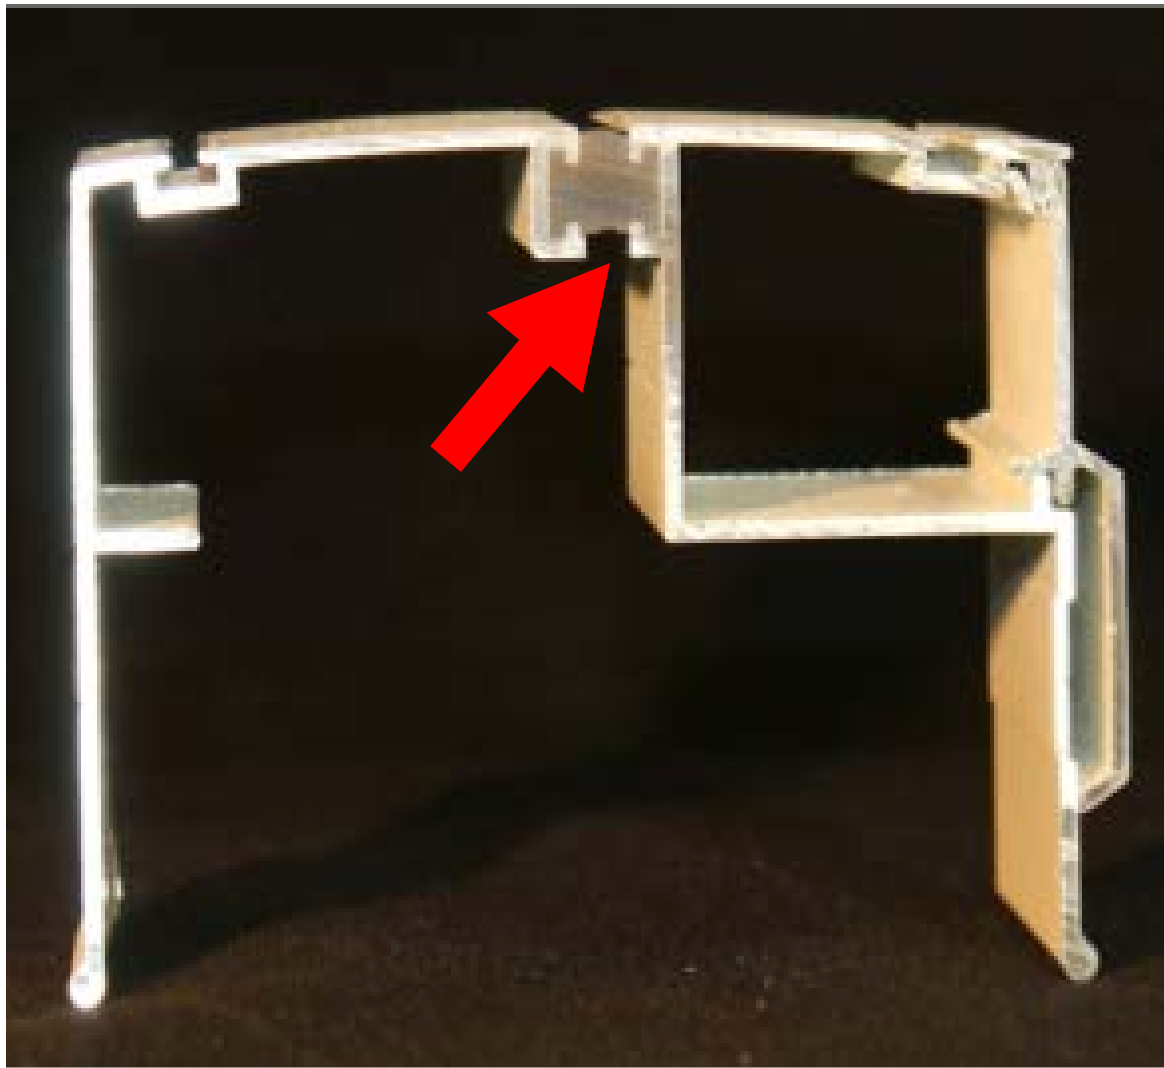

HEAVY DUTY WINDOW ROLLER

- Durable extruded frame.
- Self lubricating brass wheel.
- Fully adjustable.
- Zero maintenance.

THERMALLY BROKEN ALUMINUM EXTRUSIONS

Thermal break options in the Duralife Sunroom extrusions can help insulate your space by preventing the transfer of temperatures from the outside room surfaces to the inside room surfaces.

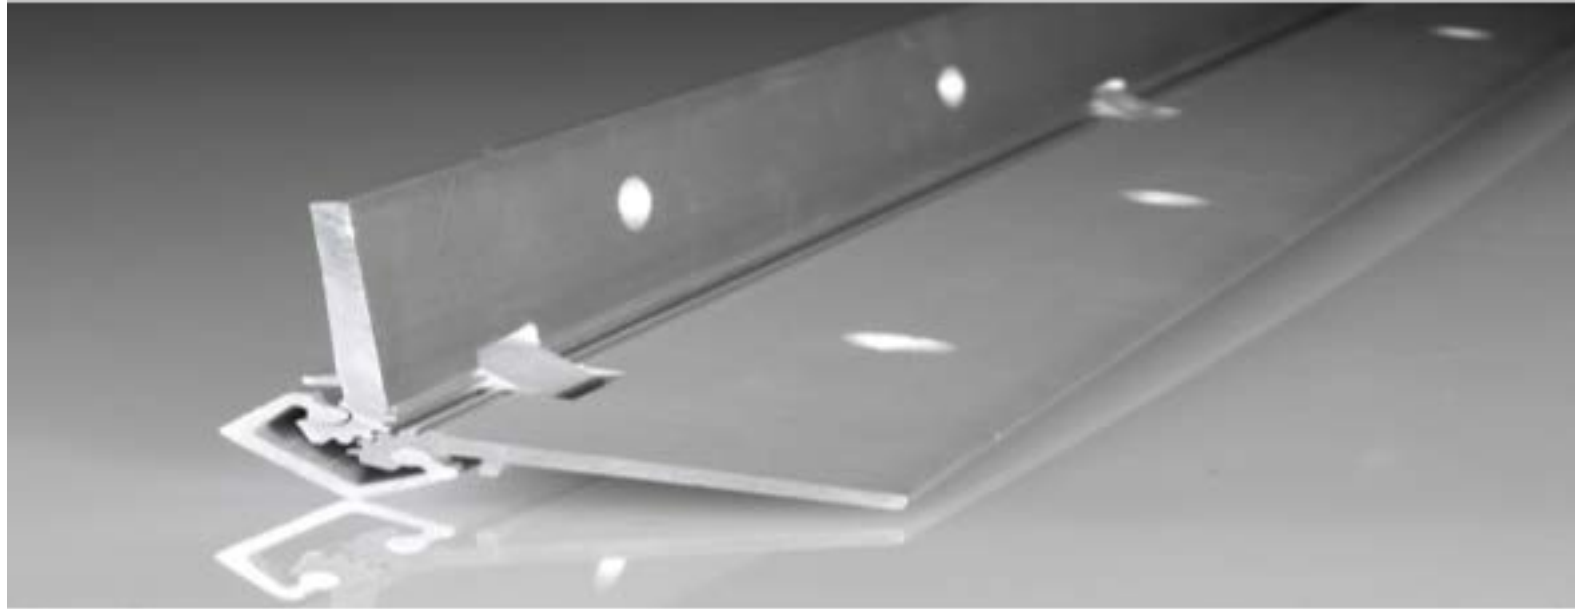

DOOR CONFIGURATIONS

- 3068 Full Light Single Door
- 6068 Full Light French Door
- 3068 Half Moon Single Door
- 6068 Half Moon Double Door
- 6068 Full Light Sliding Door

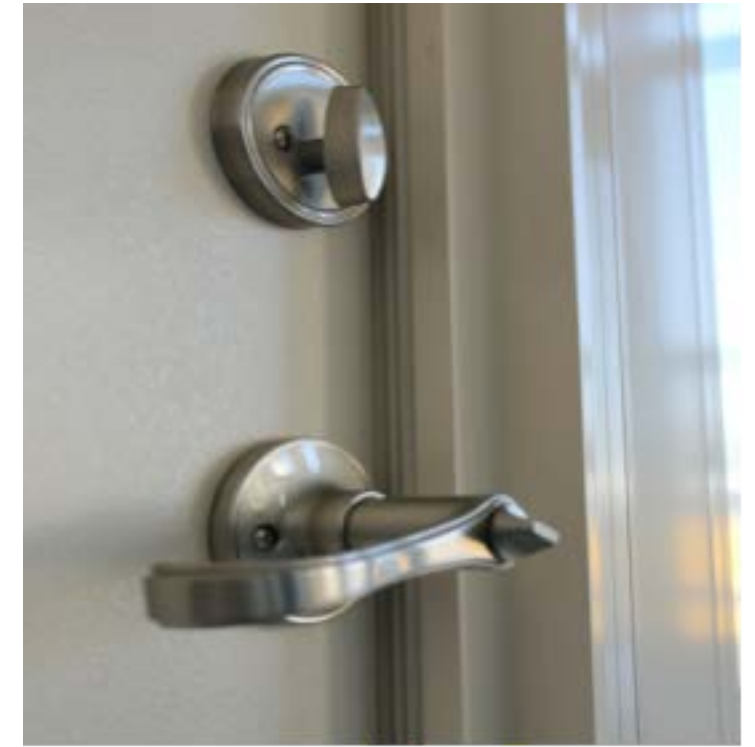

DOOR FEATURES

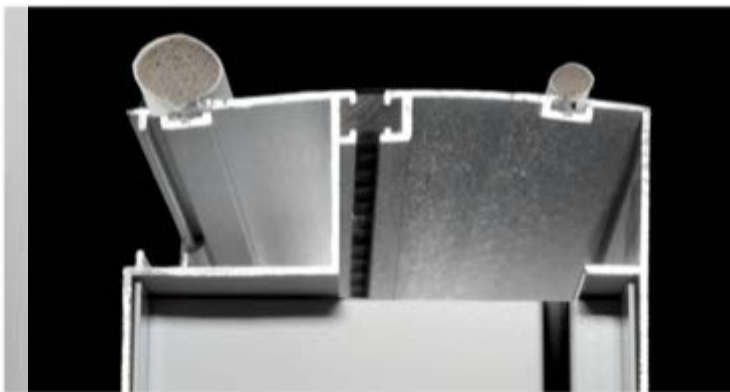

Full length mechanical hinges prevent doors from sagging by distributing load stresses uniformly. Very little effort is required to open doors and wear and tear is virtually eliminated.

All Duralife Sunroom systems come standard with steel clad doors which allows us to utilize a magnetic gasket for an airtight seal all the way around the door.

DURALIFE ENCLOSURE FRAMING

- The Duralife enclosure system complies with local codes and allows for the installation of electrical wiring.
- Hidden channels allow the use of plugs, switches and light fixtures.
- Convenient snap caps cover electrical chases.
- Electrical header comes standard with dual gasket seal that neatly seals the space between the roof and the walls.

DURALIFE ROOF SYSTEM

Duralife insulated roofs can be installed as enclosure roofs as well as patio roofs or both as shown below.
